

NO CODING NEEDED · AGES 8–11

AI Explorers

Kids who **understand** AI —
not kids who lean on it.

Your child already lives alongside AI — voice assistants, show recommendations, face unlock. **AI Explorers** is a live, 1-to-1 online course that helps them understand **how** AI actually works, instead of just using it without thinking. Over 24 sessions, they'll train real AI models, learn to spot when AI gets things wrong, and build their own mini AI project — no coding, no open chatbots.

What your child will actually do

Trains a real AI model

Uses Google's Teachable Machine — hands on from Class 3.

Becomes an "AI Detective"

Learns to spot when AI makes mistakes — and why.

Explores AI and creativity

Art, stories, and how machines "talk" — creativity meets tech.

Programs a self-driving toy car

Guides it through a maze — no prior coding needed.

Builds and demos a final project

Presented live to family — their own AI, built from scratch.

Learns AI safety and privacy

What to share, what not to — taught with real examples.

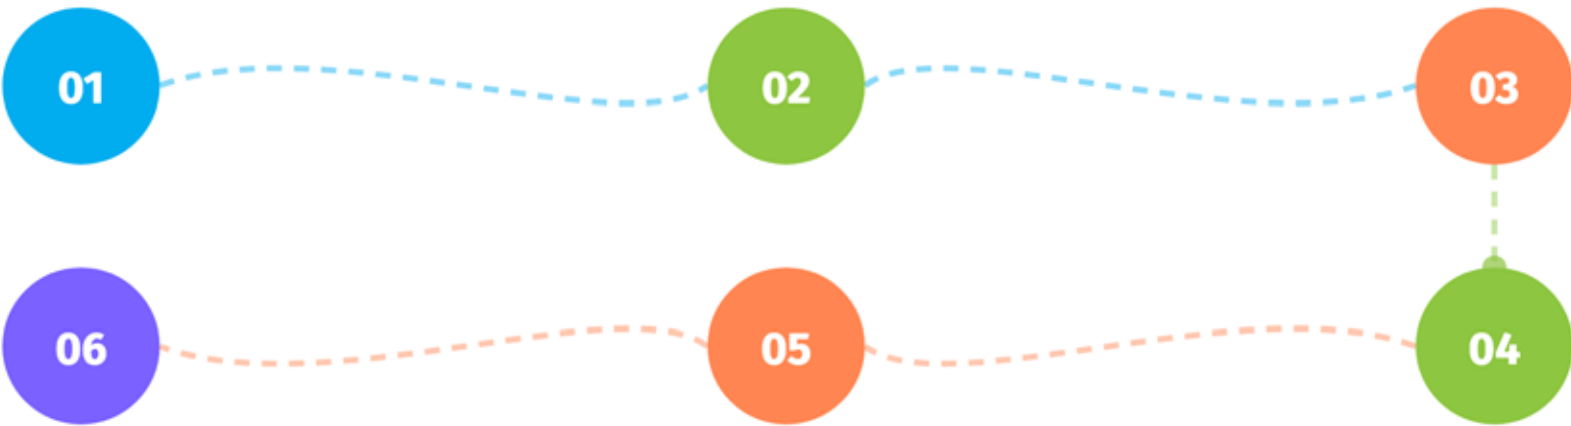

3–5
GRADES

24
SESSIONS

50min
PER CLASS

1-to-1
LIVE ONLINE

The Journey — 6 Modules

WHAT IS AI?
Building the basics — from the ground up

TEACHING A MACHINE
Training their very first AI model

AI DETECTIVE
Critical thinking and spotting AI mistakes

CAPSTONE PROJECT
Plan, build, and showcase their own AI

SMART MACHINES & FAIRNESS
Self-driving cars, privacy, and being fair

AI TALKS & CREATES
Chatbots, AI art, and language

Why Parents Choose This Course

**Builds understanding, not dependence**
No session teaches kids to use AI for homework — this is about how AI thinks, not shortcuts.

**Genuinely hands-on**
Your child trains real, working AI models from Class 3 onward — not just watching slides.

**Safe by design**
No open chatbots, no ads, no unmoderated tools — every activity uses closed, child-safe platforms.

**1-to-1, live, and personal**
The same personalised attention beGalileo is known for in math — now for AI.

TOOLS YOUR CHILD WILL USE

 Google Teachable Machine

 Google Quick, Draw!

 Blockly Games

 beGalileo AI Simulator

**A note on safety**
Every tool used in this course is closed and purpose-built for learning — there is no open chatbot access anywhere in the curriculum, and your child never has an unmoderated conversation with an AI system.

Book a free demo class
Watch your child train their first AI model in 45 minutes.
